# GLISSANDO XL<sup>+</sup>

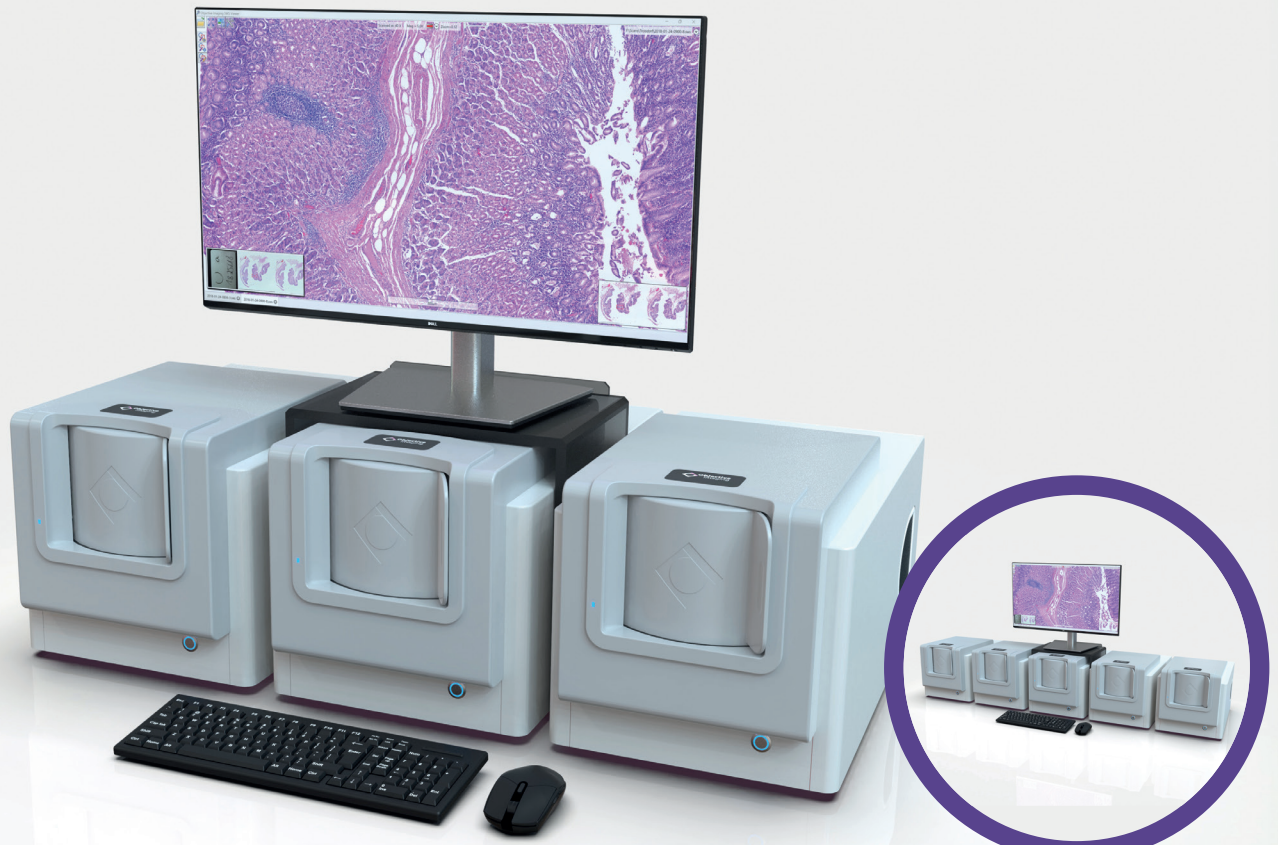

## FLEXIBLE MULTI-SCANNER SYSTEM

Introducing the latest Digital Pathology Product offering from Objective Imaging – The Glissando XL<sup>+</sup>. A truly flexible multi-scanner solution that can grow in parallel with your ever increasing workload.

### THE KEY FEATURES OF THE GLISSANDO XL<sup>+</sup> ARE:

- ◆ True Parallel Scanning for high throughput e.g. 3 scanners = 60 slides/hr
- ◆ Scalable Slide Capacity
- ◆ Scan Engine Redundancy Maximises Up-time
- ◆ Exceptional Image Quality
- ◆ Compact solution. e.g. 60 slides/hr in less than 1m of bench space
- ◆ Compatible with all major IMS systems and OI ImageShare
- ◆ Fully compatible with existing Glissando 20SL scanners

# *Solutions for scanning and sharing images for pathology applications*

Objective Imaging's proven Glissando slide scanners deliver exceptional image quality, performance, and value in a compact system ideal for entry-level and medium-capacity workflows. The ImageShare workstation provides simple-to-implement whole-slide image storage and remote viewing, allowing Glissando scans to be quickly

and easily shared and viewed anywhere using simple web browser links.

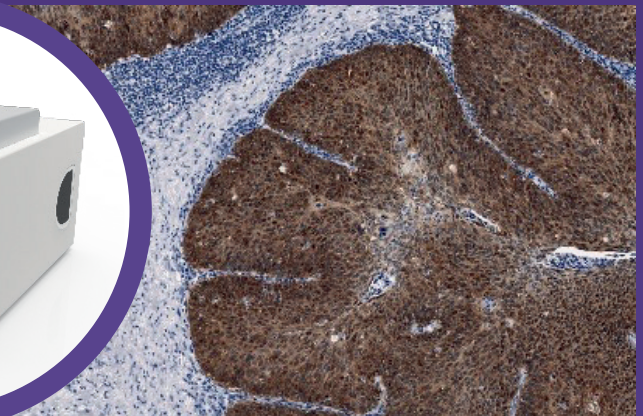

Together, our Glissando scanners and ImageShare platform provide a complete digital pathology scanning and sharing solution that can be implemented with minimal fuss and cost.

## **Glissando Scanner Range**

The Glissando scanners offer medium- and low-capacity slide scanning with best-in-class image quality and performance.

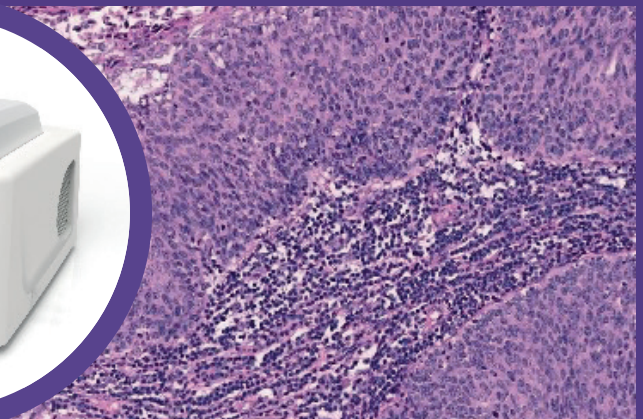

### **Glissando 20SL**

Medium capacity auto-loading scanner for up to 20 slides

### **Glissando Desktop Scanner**

Compact, 2-slide scanner

### **Glissando POL**

Flexible scanner for both brightfield and polarised light applications
